"It is a pleasure to head the department of Computer Engineering. The department has a team of highly experienced and motivated faculty members who are in process of tuning the young minds to make them globally competitive. The strength of the department is highly motivated students who understand the dynamics of the industry and upgrade their skills accordingly. The scope of computer Engineering is endless. The students of the computer engineering are highly demanded by the recruiters of the top companies"

About Department:

Vision:

Strengthen student with good technical skills and research and to be one of the contributors towards society by indulging there practical knowledge in real life practices & develop human values within every individual.

Mission:

- ***Extends knowledge thorough good teaching methodologies.***
- ***Make student adaptable to handle any situation and face the problem in any environment with confidence.***
- ***Make understands student in importance of computer engineering in society.***
- ***Apply Computer Technologies and tools in surroundings while making real life environment at ease.***

PEO'S

PEO 1. Provide socially responsible, environment friendly solutions to Computer engineering related broad-based problems adapting professional ethics.

PEO 2. Adapt state-of-the-art Computer engineering broad-based technologies to work in multi-disciplinary work environments.

PEO 3. Solve broad-based problems individually and as a team member communicating effectively in the world of work

PO'S

PO 1.*Basic knowledge: Apply knowledge of basic mathematics, sciences and basic engineering to solve the broad-based Computer engineering problem.*

PO 2.*Discipline knowledge: Apply Computer engineering discipline - specific knowledge to solve core computer engineering related problems.*

PO 3.*Experiments and practice: Plan to perform experiments and practices to use the results to solve broad-based Computer engineering problems.*

PO 4.*Engineering tools: Apply relevant Computer technologies and tools with an understanding of the limitations.*

PO 5.*The engineer and society: Assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to practice in field of Computer engineering.*

PO 6.*Environment and sustainability: Apply Computer engineering solutions also for sustainable development practices in societal and environmental contexts and demonstrates the knowledge and need for sustainable development.*

PO 7.*Ethics: Apply ethical principles for commitment to professional ethics, responsibilities and norms of the practice also in the field of Computer engineering.*
